

StancuBYT (SBYT)

Crypto Modern Whitepaper

ERC-20 Token on Ethereum

Contract Address:

0x44Cf220399be798baeaE45fd7C4fF44623713833

Introduction & Abstract

StancuBYT (SBYT) este un token ERC-20 construit pe blockchain-ul Ethereum, conceput pentru a oferi transferuri rapide, securitate si compatibilitate maxima. Acest document este destinat investitorilor, utilizatorilor si platformelor de verificare.

Vision, Mission and Objectives

Viziunea proiectului StancuBYT este dezvoltarea unui ecosistem crypto modern, transparent si sustenabil. Misiunea este facilitarea adoptiei blockchain printr-un token simplu, cu reguli clare si supply fix.

Technical Architecture

SBYT utilizeaza standardul ERC-20, fiind complet compatibil cu portofelele Ethereum si DEX-uri precum Uniswap. Contractul nu include functii de mint sau taxe ascunse.

Tokenomics

Parametru	Valoare
Total Supply	4,000,000 SBYT
Decimals	18
Standard	ERC-20
Initial Price	200,000 SBYT / 1 ETH
Taxes	0% Buy / 0% Sell (Uniswap)

Token Distribution

40% Liquidity & Market Making
20% Ecosystem Development
20% Team & Development (vesting 24 luni)
10% Partnerships
10% Strategic Reserve

Legal & Risk Disclaimer

Acest document nu reprezinta sfat financiar. Tokenul SBYT nu este un instrument financiar reglementat. Investitiile in criptomonede implica riscuri semnificative.
